

Name: _____ Block: _____ Date: _____

Warm-Up: Food Facts - *Look at the crop map of Maine posted on my blog.*

1. Which type of plant is grown over most of the state?

2. Find Portland. Which crop grows closer to Portland, blueberries or apples?

3. True or False: Most of Maine's eggs are grown in Northern Maine.

4. True or False: Most of Maine's potatoes are grown in Northern Maine.

5. True or False: Most of Maine's cranberries are grown in Northern Maine.

6. Which crop does Maine produce more of, broccoli or potatoes?

7. Imagine you buy a can of tomatoes for \$1.00. Remember what you have learned about all of the people and places involved in the journey of the tomatoes from the farm all the way to the can in the supermarket. Make an estimate of how many cents from that \$1.00 goes to each of the people involved in the process:

	ESTIMATE: How many cents?	ACTUAL: How many cents?
Money paid for <u>Transportation</u>		
Money paid to the <u>Workers at the Processing Plant</u>		
Money paid for <u>Processing</u> (not including workers)		
Money paid for <u>Packaging</u>		
<u>Taxes</u> the company has to pay to the government		
Money paid for <u>Advertising</u>		
Money that goes to the <u>Farmer</u>		
<u>Profit</u> (Money that goes to the companies after all their expenses are paid.)		
Money that goes to <u>other expenses</u>		
TOTAL (must equal \$1.00)
