Newsela: Water Cycle Article

Read the article – you can choose the reading level on the right side of the page. Try to find a level that is not too hard and not too easy to understand. Write down notes from the article about different parts of the water cycle (hint – you should have many details to write from each bolded section of the article). Anytime there is a detail related to evaporation, condensation, precipitation or accumulation, add it to your notes using boxes and bullets. Do not copy the notes word-for-word.

EVAPORATION

CONDENSATION

PRECIPITATION

ACCUMULATION

Choose three important captions from the article (each should be 1-3 sentences long). Write the caption (word for word) and illustrate using details and labels.
