Regional Energy Use Map Analysis

Look at the Regional Energy Use Map on my blog to complete each question.

1. Which region gets the greatest percentage of their energy from coal?
2. Which region gets the greatest percentage of their energy from natural gas?
3. Which region gets the greatest percentage of their energy from nuclear power?
4. Which region gets the greatest percentage of their energy from hydro and non-hydro-renewables (you'll have to add them together)?
5. What percentage of New England's energy comes from fossil fuels (add fuel oil, coal and natural gas)?
6. What percentage of New England's energy comes from hydro and non-hydro-renewables (add them together)?
7. Why do you think regions use different amounts of each energy source?
8. Which region do you think releases the greatest amount of CO₂? How do you know?
9. Which region do you think releases the least amount of CO₂? How do you know?
